Report of the American Bureau of Hygiene, for the year 1916

Published by the American Bureau of Hygiene

Washington, D. C.

The American Bureau of Hygiene, established in 1901, is a non-profit organization

dedicated to the promotion of public health and the prevention of disease.

Its principal activities are the collection and dissemination of information

on the causes and prevention of disease, and the promotion of public health

education. The Bureau has a wide representation in the various branches

of the medical profession, and is in constant communication with the

various health authorities of the United States and foreign countries.

The Bureau's work is carried on through a series of committees and

sub-committees, which are composed of experts in the various fields of

public health. These committees are responsible for the planning and

execution of the Bureau's work, and for the preparation of reports and

publications. The Bureau's work is supported by the Government of the

United States, and by the various State and local health authorities.

The Bureau's work is of great importance to the public health, and

it is hoped that this report will be of interest and value to the

public. It is published by the American Bureau of Hygiene, and is

available for sale at a price of \$1.00 per copy.

Orders for copies of this report may be sent to the American Bureau of

Hygiene, 1200 Connecticut Avenue, N. W., Washington, D. C.

or to the Government Printing Office, Washington, D. C.

May 1954

ESTIMATED VALUE OF MANUFACTURERS' SHIPMENTS,

BY QUARTERS 1953

The basic trend data used in making the estimates included in this report are the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. In addition, a limited number of industries are incorporated by other means. The trend established for each industry is applied to the gross value of shipments universe for the industry available from the Annual Census of Industry Survey.

The estimates for 1953 are shown by the 17 major industrial groups, and not by individual industries. They are shown, also, by economic use groupings, into which individual industries have been assigned in total. In both presentations, data for 1952 are included to provide a measure of change.

The estimated gross value of manufacturers' shipments for 1953 is \$17,655,723,000, a gain of approximately 4.2 per cent.

Prepared in the Special Projects Unit, Industry and Merchandising Division.

ESTIMATED VALUE OF MANUFACTURERS' SHIPMENTS, SECOND QUARTER 1954

The basis trend data used in making the estimates included in this report are the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. In addition, a limited number of industries are incorporated by other means. The trend established for each industry is applied to the gross value of shipments universe for the industry available from the Annual Census of Industry Survey.

The estimates are shown by the 17 major industrial groups, and not by individual industries. They are shown, also, by economic use groupings, into which individual industries have been assigned in total. In both presentations, data for 1952 and 1953 are included to provide a measure of change.

In the current release, estimates for the four quarters, 1953, and for the first two quarters, 1954, have been adjusted to 1953 levels established by a preliminary tabulation of the Annual Census of Industry Survey for 1953. The revised totals show that the value of manufacturers shipments for the first six months of 1954 totalled \$8,607,736,000.

Prepared in the Special Projects Unit, Industry and Merchandising Division.

ESTIMATED VALUE OF MANUFACTURERS' SHIPMENTS,

THIRD QUARTER 1954

The basis trend data used in making the estimates included in this report are the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. In addition, a limited number of industries are incorporated by other means. The trend established for each industry is applied to the gross value of shipments universe for the industry available from the Annual Census of Industry Survey.

The estimates are shown by the 17 major industrial groups, and not by individual industries. They are shown, also, by economic use groupings, into which individual industrial have been assigned in total. In both presentations, data for 1952 and 1953 are included to provide a measure of change.

In the current release, estimates for the four quarters, 1953, and for the first three quarters, 1954 have been adjusted to 1953 levels established by a preliminary tabulation of the Annual Census of Industry Survey for 1953. The revised totals show that the value of manufacturers shipments for the first nine months of 1954 totalled \$12,894,173,000.

Prepared in the Special Projects Unit, Industry and Merchandising Division.

ESTIMATED VALUE OF MANUFACTURERS' SHIPMENTS,

FOURTH QUARTER 1954

The basis trend data used in making the estimates included in this report are the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. In addition, a limited number of industries are incorporated by other means. The trend established for each industry is applied to the gross value of shipments universe for the industry available from the Annual Census of Industry Survey.

The estimates are shown by the 17 major industrial groups, and not by individual industries. They are shown, also, by economic use groupings, into which individual industries have been assigned in total. In both presentations, data for 1952 and 1953 are included to provide a measure of change.

In the current release, estimates for the four quarters, 1953, and for the four quarters, 1954 have been adjusted to 1953 levels established by a preliminary tabulation of the Annual Census of Industry Survey for 1953. The revised totals show that the value of manufacturers shipments for the year 1954 totalled \$17,305,643,000.

Prepared in the Special Projects Unit, Industry and Merchandising Division.

DOMINION BUREAU OF STATISTICS

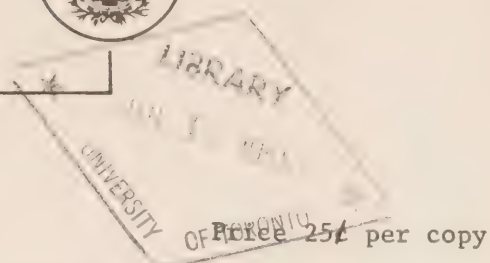

OTTAWA - CANADA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

31-D-01

Vol. 2 No. 1

ESTIMATED VALUE OF MANUFACTURERS' SHIPMENTS,

FIRST QUARTER 1955

The basic trend data used in making the estimates included in this report are the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. In addition, a limited number of industries are incorporated by other means. The trend established for each industry is applied to the gross value of shipments universe for the industry available from the Annual Census of Industry Survey.

The estimates are shown by the 17 major industrial groups, and not by individual industries. They are shown, also, by economic use groupings, into which individual industries have been assigned in total. In both presentations, data for 1953 and 1954 are included to provide a measure of change.

In the current release, estimates for the four quarters, 1953, and for the four quarters, 1954 have been adjusted to 1953 levels established by a preliminary tabulation of the Annual Census of Industry Survey for 1953. The revised totals show that the value of manufacturers shipments for the first quarter 1955 totalled \$4,424, ~~4~~ 2,000.

Prepared in the Special Projects Unit, Industry and Merchandising Division.

ESTIMATED VALUE OF MANUFACTURERS' SHIPMENTS,

SECOND QUARTER 1955

The basic trend data used in making the estimates included in this report are the values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. In addition, a limited number of industries are incorporated by other means. The trend established for each industry is applied to the gross value of shipments universe for the industry available from the Annual Census of Industry Survey.

The estimates are shown by the 17 major industrial groups, and not by individual industries. They are shown, also, by economic use groupings, into which individual industries have been assigned in total. In both presentations, data for 1953 and 1954 are included to provide a measure of change.

In the current release, estimates for the four quarters, 1953, and for the four quarters, 1954 have been adjusted to 1954 levels established by a preliminary tabulation of the Annual Census of Industry Survey for 1954. The revised totals show that the value of manufacturers shipments for the first six months of 1955 totalled \$9,541,076,000.

Prepared in the Special Projects Unit, Industry and Merchandising Division.
